

NEW ADVENTURE TRAVEL PACK GREGORY JUXT

RIGHT DOWN TO THE LAST DIGITAL DETAIL

Gregory presents the Juxt for Winter 2020 - a pack designed to take digital nomads and modern adventure travelers off the beaten path. The Juxt features multiple organization options and a convenient, removable electronics caddy for laptops and tablets. The suspension system is inspired by Gregory's technical trekking backpacks, while the robust front panel provides good weather protection. As such, the Juxt offers full comfort and functionality - for business trips, digital travel and working remotely in the great outdoors.

The Gregory Juxt is a backpack designed for digital nomads and sized to fit in a plane's overhead compartment. Available in both a 28-litre and 34-litre version, it provides plenty of storage room and clever pocketing. The padded, removable caddy conveniently accommodates laptops (max. 15.6") and has an extra compartment for tablets (max. 9.7"), plus additional space for accessories. This large pack stores away conveniently as carry-on cabin luggage, whilst keeping in-flight essentials close to hand.

The electronics caddy conveniently clicks in and out of its dedicated compartment thanks to the SpeedClip attachment system. For outdoor adventures, the caddy can be swapped for a 3D Hydro Reservoir as Gregory's hydration bladder has the same SpeedClip attachment.

The Juxt is equipped with multiple pouches and pockets for optimal organization when travelling. At the top of the pack is a quick-access top pocket for a wallet or other valuables. The clever, secure zipper catch helps prevent unwanted access. In addition, there are numerous mesh pockets to accommodate cable, mouse, other associated smaller items, plus a special compartment for a power bank and charger. Discrete cable routing on the front of the pack allows a smart phone to be easily connected to the mobile charger.

For the suspension system, Gregory draws on the expertise of its technical packs. The back panel, hip belt and breathable shoulder harness are all made from durable EVA foam. The breathable air mesh backpanel promotes superior air circulation. Inside the pack, an internal lightweight alloy frame keeps weight supported and close to the back for a comfortable carry.

About Gregory Mountain Products

Founded in 1977 by Wayne Gregory, Gregory has been a long-time leader in expedition packs, trekking packs, day packs and travel gear. Gregory makes packs and nothing else. World renowned for setting durability, comfort and performance standards in all their products, Gregory has won numerous awards for its pack designs from leading international outdoor and mountaineering magazines. Responsible for many industry firsts in pack fit and design, the Gregory research and design team continues to lead the way in innovative backpack technology and performance.
